DIGITAL IS EASY

Introducing the digital shower range with wireless control from Mira Showers.

www.mirashowers.co.uk/expert
Digital is easy!

So how do digital showers with wireless control work?

There are three parts that make up our digital showers with wireless control. They are the digital mixer unit (1), the wireless shower control (2) and the shower fittings (3).

The digital mixer unit is the brains of the shower. It takes water from the hot and cold supplies and mixes it to the perfect showering temperature, just like a normal mixer. The main difference is that, unlike a normal mixer, you can mount the digital unit away from the shower control, so you can hide it away in the loft, under the bath or in an airing cupboard. This makes installation much quicker and more flexible, causes less disruption and gives a sleek, minimal look to the shower area.

Not only that, but there's a choice of digital mixers. You can choose from a pumped mixer for gravity fed systems, or a high pressure mixer for high pressure systems. This means you can fit a digital shower on any plumbing system.

When it comes to the shower control they don't get more flexible than our wireless controllers. You can mount them up to 10 metres away from the digital mixer unit. You can even add a second control so your customer can adjust the settings from outside the shower area!

Best of all, there's also a choice of fittings — either rear fed or ceiling fed — to make life easier! So you can be sure to find a Mira wireless digital mixer shower to suit your customers' needs.
Installing a Mira Digital Mixer Shower

Using Mira Vision, we show you how easy it is to fit any Mira digital shower with wireless control.

You can fit our wireless digital showers in an hour.

From the moment you open the packaging you’ll find that our digital mixers make life easy. That’s because the digital mixer, wireless shower controller and shower fittings are all supplied in one box, so you won’t have the hassle of buying lots of different parts. We’ve even supplied the fixings you’ll need too.

Once you’ve unpacked all the parts you simply need to decide where to mount the digital mixer unit and controller. The wireless technology in our digital mixers means you can mount the digital mixer unit where it’s convenient, for example, in the loft, under the bath or in an airing cupboard. The shower control will ‘talk’ to the unit up to 10 metres away – just like your wi-fi broadband connection at home. So it really is flexible.

The connections on our digital mixers are push-fit so everything connects up quickly and easily.

You’ll find the controller and fittings easy to fit too. The controller fixes to the wall with just 2 screws, and the fittings with 4 screws, making it quick to fit, saving you time and money.

Setting up the shower is quick too. Access to the program menu is through the shower controller, so you can make all the adjustments there.

**Step 1**

Choose a convenient place to fit the digital mixer unit. This could be in the loft, under the bath or in an airing cupboard. You can mount the unit on a horizontal or vertical surface.

**Step 2**

Decide where you want to put the shower fittings, then screw the slide bar to the wall using the 4 screws provided.

**Step 3**

Decide where you want to put the wireless shower control (this can be up to 10 metres away from the digital mixer unit), then screw it to the wall using the 2 screws provided.

**Step 4**

Connect the pipework to the digital mixer unit and then connect to the shower fittings – simple!
We design, make and assemble most of our products here in Britain. And our digital mixer showers are another great example of British engineering at its best. Not only are they easy to fit, but they’re also packed full of great technology designed to make them easy to use as well.

Digital Technology Comparison

See how Mira digital technology stacks up against Aqualisa Quartz Digital. And make the next digital shower you buy a Mira.

*Aqualisa Quartz Digital Bath

Wireless control – No cable required to link the digital mixer and shower controls

Thermostatic temperature stability with digital intelligence

Warm up mode – The shower heats up and pauses when it’s at the ideal temperature

Clock display with timer – Allows the user to set their shower duration

Eco setting – Saves your customer water and money by limiting the shower time and flow

Flipstream™ technology – Award-winning showerhead with 1 flip action, 4 unique sprays
Mira Platinum features all the technology we pack into each of our digital mixer showers and the flow is adjusted with a simple turn of the dial.

Mira Vision features all the technology we pack into each of our digital mixer showers with full push button control.

Our digital mixers can be installed in as little as an hour and are the ideal choice for gravity fed, mains and combi boiler systems. They’re also very accurate when it comes to temperature and top-notch when it comes to features.

They’re great for your customer:
- High flow rates and wireless control
- Thermostatic temperature stability with digital intelligence
- Separate push button controls for start/stop, flow and temperature
- Programmable – warm up mode, eco setting and clock display & maximum temperature setting
- Additional controller available
- Flipstream™ technology – one flip action 4 unique sprays

Technical bit:
- Mira Vision & Platinum are available in ceiling or rear fed options
- High pressure and pumped valves available
- Pipe connection points: push fit & compression
- Minimum maintained pressure: 0.5 BAR HP / 0.01 BAR LP
- Maximum maintained pressure: 5.0 BAR HP / 1.0 BAR LP
- Maximum static pressure: 10.0 BAR HP / 1.0 BAR LP

Digital Mixer Unit Options

Pumped Digital Mixer Unit
High Pressure Digital Mixer Unit

*Rotate controller to adjust flow rate with Mira Platinum

*Both are available without fittings – control and digital mixer unit only.
**MIRA PLATINUM DUAL**
Digital Mixer Shower

Mira Platinum Dual features all the technology we pack into each of our digital mixer showers and much more, including digital diverter for the ultimate in luxury showering.

It’s great for your customer:
- Digital diverter allows user to divert between the handset and overhead or have both on together
- 250mm luxury overhead with rub clean nozzles
- Overheads have easy fit feature to make installation quick
- Shower timer setting – users can set it to run for between 1–30 minutes
- All settings can be adjusted from the user interface
- Can be used to fill a bath

Technical bit:
- Mira Platinum Dual is available in ceiling or rear fed options
- High pressure and pumped valves available
- Pipe connection points push fit & compression
- Minimum maintained pressure: 0.5 BAR HP/ 0.01 BAR LP
- Maximum maintained pressure: 5.0 BAR HP/ 1.0 BAR LP
- Maximum static pressure: 10.0 BAR HP/ 1.0 BAR LP

**MIRA PLATINUM DUAL**
(Without fittings)

Mira Platinum Dual is available without the fittings so your customer can use their existing fittings or supply a bath filler.

All the features of Platinum Dual plus:
- Customer can use their existing fittings or choose to supply a bath filler
- Customer can choose which outlet to select for bath fill mode
- Bath fill ‘learn’ function allows customer to teach the bath how long to run for to reach the right depth and temperature

Image shows how Platinum Dual without fittings can be used for bath fill.
